UNIFIED COMMUNICATION SOLUTIONS

In essence, Unified Communications is a strategy that an organization should adopt to meet its individual requirements versus necessarily purchasing a one size fits all products. Options should encompass all communications applications that can be unified: telephony, messaging, mobility, presence and conferencing. A full complement of features will ensure those of critical importance to your organization can be readily deployed.

Dynamic Systems Solutions can make it possible to integrate high-quality audio, video, and data interactivity, live or recorded, to a large group without latency by leveraging a range of vendor's technologies, platforms, and roadmaps to create a combined vision to make collaboration a reality for enterprises.

COMMUNICATION SOLUTIONS

Dynamic Systems Solutions provides the systems and services for powering your visual communications ecosystem. A visual ecosystem is comprised of many different visual display solutions working in concert to create an immersive visual experience that educates, entertains and/or influences viewer behaviors.

These Solutions can be combined or added one by one as business requirement increases all being powered by the same Enterprise Server and Client Application. These Solutions include, Digital Signage, Video Walls, Way-Finding, Information Kiosks, Door Displays, LED Wallboards, Call Centers & Network Operation Centers Real Time Data Monitoring.

MOBILITY SOLUTIONS

Enterprise mobility is driven by the demand for seamless access to information anytime, anywhere, and from any device. Mobility can facilitate business continuity, improve collaboration, simplify teleworking, and increase employee retention. As these wireless networks grow, their scalability is primarily determined by the underlying architecture for of the wireless LAN and its interworking with the wired architecture.

Dynamic Systems Solutions has extensive experience in the design, deployment and support of your wireless requirements and can assist with interoperability of voice, video and security considerations.

NETWORK INFRASTRUCTURE SOLUTIONS

In partnership with leading principals networking vendors, we provide networking solutions based on advanced data transfer technologies such as Gigabit Ethernet, LAN to WAN solutions, IP based networks, frame relay, financial transaction networks, etc. With completely customizable options, Dynamic Systems Solutions work with you to develop a system that protects you from threats in office and out on the web.
